

Since 1940, New England Institute of Technology (NEIT) has been committed to the development of technical programs that prepare graduates for positions of leadership in the industrial and technical communities in Rhode Island. The largest technical college in southern New England, New England Tech has an annual enrollment of over 3,000 students in over thirty Associate in Science and Bachelor of Science Degrees, all focused on the technologies.

## NEW ENGLAND INSTITUTE OF TECHNOLOGY PARTNERSHIPS AT A GLANCE

NEIT's PK-12 partnership activities are primarily focused on college readiness and access activities, including career fairs and early/dual enrollment programs.

NEIT works with area high schools to develop articulation agreements in technical courses and allows high school seniors to enroll full time at NEIT while still completing high school.

**TOP IMPACT PARTNERSHIPS** Respondents were asked to select partnerships at their institutions with the greatest impact on PK-12 education in Rhode Island, with an emphasis on innovative and collaborative partnerships that focus on: science, technology, engineering, and mathematics; personalization; the new high school graduation requirements; workforce development; and under-served communities.

#### ADVANCED TECH ARTICULATION AGREEMENTS

NEIT works with area high schools to develop articulation agreements in technical courses. Students completing the approved courses at the high school with a grade of “B” or better are eligible for advanced standing and reduced tuition, and will not have to repeat work they have already taken in high school. In some cases, students may complete their Associate’s Degree in less time.

#### ★ ACCUPLACER PROJECT

This partnership provides North Providence and Warwick students with the opportunity to take the Accuplacer assessment during high school. NEIT provides feedback to students on their scores, including what areas of improvement are needed to avoid remedial courses. Students have the opportunity to retake the assessment, if necessary, should they decide to attend NEIT. ★ [learn more about this partnership by downloading a case study at \[www.pk-16.com\]\(http://www.pk-16.com\)](#).

#### EARLY ENROLLMENT

In cooperation with a student’s high school, NEIT will allow a high school senior to enroll full time at NEIT while currently enrolled at the high school. The high school agrees to accept NEIT’s courses, usually in English and Math, to fulfill the student’s graduation requirements. Students can then earn their high school diploma while beginning their college degree at NEIT.
